About me: As a PHP developer, I have an interest in learning new technologies. My goal is to improve my software skills and actively participate in the development of (**Language:** Uzbekt, English - A2)

Projects: RENT APP: [Rent App](#)

Rent App is a Laravel and PHP web application that simplifies home rentals by connecting tenants with property owners. It features a user-friendly interface, advanced search, secure authentication, and a property management dashboard. Built with PHP, Laravel, Docker, PostgreSQL, HTML/CSS, CI/CD and VUEJS Rent App enhances the rental experience and fosters a trusted renter community

SURVEY BOT: [repositori](#)

This Telegram bot is a survey platform developed using PHP programming language. Users have the ability to vote on one survey at a time, with the requirement to join specified channels before casting their votes. An admin panel is also available, allowing administrators to add new channels or groups for advertising purposes. The admin panel is hosted on the web, and the bot utilizes MySQL, PHP, and Docker technologies. This bot provides users with a convenient interface and an interactive survey experience.
